# Floor Standing Tablet Display

## ★ VESA Floor Stand

Simple assembly and disassembly, using common hand tools - means our floor stand can be put together quickly. Its sturdy, tubular steel construction can take the punishment of the trade show floor or retail traffic while keeping the charging cable securely hidden & out of sight.

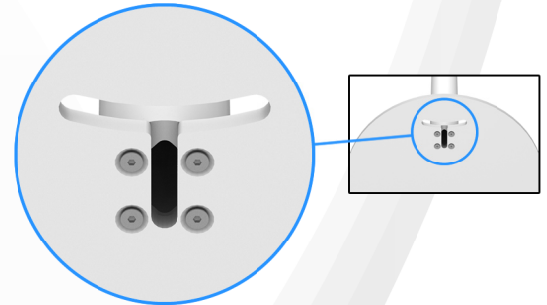

## ★ Rugged iPad / Tablet Enclosure

Our VidaMount VESA Tablet Enclosures are engineered like no other enclosure on the market today. With attention to details like a mic hole, speaker grill, interior pads for tablet protection, and a power button service knockout. Our enclosure fully wraps your iPad, Android, or Windows Surface tablet for ultimate protection and theft prevention.

## ★ Wire Management & Security

Charging cable can be passed through the mounting plate's center hole, which is sized to allow for most USB connectors to pass with ease, and into the stand's hollow tube. Once in the tube, the cable can be passed through the bottom. All cables are kept neatly out of sight!

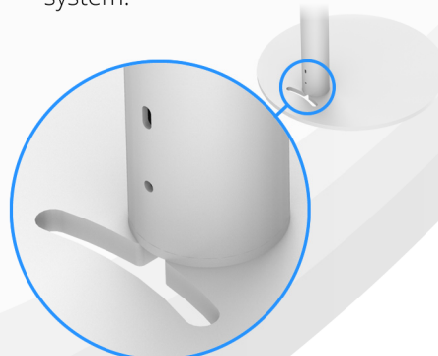

## ★ Custom Power Button Access

As shipped, the enclosure covers the power button. A tiny thru hole still provides the ability to actuate the power button using a paper clip or other tool. Alternatively - for free, unfettered power button access, the cover is removable as needed!

## ★ Theft Prevention Kensington Lock

Our floor stand includes a Kensington Security Slot that is compatible with any Kensington laptop security lock and cable system.

## ★ Keep the Tablet Charged!

Our In-line VidaPower USB to CAT5 adapter is small enough to fit inside the stand's inner tube and provide power directly to the tablets' USB charging cable - using a single CAT5 cable! Now, you don't need an expensive electrician to run AC power nearby for charging.
